

Most shipping companies use “dimensional weight” to calculate shipping costs, not the actual weight of the item. The Shipping Weight columns reflect dimension weight calculations and should be used to estimate costs. Actual weights are included for reference.

| Model Number | Number of Pieces | Dimensions (L x W x H,) | US Shipping Weight (Pounds) | Int'l Shipping Weight (lbs / kg) | Actual Weight (Pounds) | Actual Weight (Kilograms) |
|---|------------------|-------------------------|-----------------------------|----------------------------------|------------------------|---------------------------|
| RLS-8350/8500 Libraries [↑] | | | | | | |
